---

---

An offshore oil rig is shown in the background, situated in the middle of the ocean under a clear blue sky. The rig is a complex structure with yellow and blue components, including cranes and drilling equipment.

# STILL YOUR SERVICE PROVIDER IN THE FUTURE

## WHO WE ARE

STIGL FZE initially established in 2003 and have recently entered into agreements with various local third-party companies in order to be able to offer the market a wide range of Drilling rigs / Well Control / Pressure Control equipment and Drilling / Rental Tools, Both on a SALE and/or RENTAL basis.

There is a very brief snapshot of STIGL history and capabilities for your further consideration: Since 2003 STIGL have worked with over a hundred clients in more than twenty countries worldwide. STIGL operates an in-house Quality Management system in strict accordance with the latest applicable ISO standard.

---

# **Most commercially attractive service**

## **Empowering our clients**

.We ensure that our third party partners follow and comply with these appropriate standards too.

All STIGL owned or managed assets have full traceability to point of manufacture.

STIGL work with market-leading local service/ support centres to ensure that our clients receive the highest quality product and service.

Since STIGL have been in this industry for some fifteen years we FULLY understand all the commercial and technical aspects of the business and (importantly) we can assure our clients of the most commercially attractive service available.
